

I'd be happy to help you with that!

****ATS Compatibility Score: 85****

The resume shows good formatting, with clear headings and bullet points. However, the ATS may still struggle with some of the formatting.

****Skill Relevance Score: 90****

The candidate has relevant technical skills, including programming languages, data analysis tools, and machine learning.

****Formatting Score: 75****

While the resume has clear headings and bullet points, the layout is somewhat unorthodox, making it difficult to read.

****Suggestions for Improvement:****

1. ****Consistent formatting:**** Use a standard font, font size, and line spacing throughout the resume.
2. ****Streamlined content:**** Remove unnecessary sections or merge similar information to create a more concise resume.
3. ****Clear section headings:**** Use descriptive and concise headings to help recruiters quickly identify the content.
4. ****Technical skills:**** Consider adding specific skill levels or proficiency percentages to give recruiters a better idea of the candidate's abilities.
5. ****Projects:**** Instead of including a separate "PROJECTS" section, consider incorporating relevant project information into the resume.
6. ****Achievements:**** While achievements are nice to include, consider moving them to a separate section or highlighting them in a different way.
7. ****Education:**** Instead of stating the graduation date, consider including the expected graduation date or the degree earned.

Overall Score: 82

By making these adjustments, the candidate can improve the readability, clarity, and effectiveness of their resume.
