

****ATS Compatibility: 60****

The resume is mostly text-based, which is good for ATS scanning. However, there are a few issues:

- * The education section is not formatted consistently, which may cause issues with ATS parsing.
- * The "CO-CIRCULAR ACTIVITIES" and "PERSONAL PROFILE" sections are not clearly labeled, which may cause confusion.
- * The "SKILLS" section is not bullet-pointed, which makes it harder for ATS to extract relevant information.

****Skill Relevance: 80****

The candidate has mentioned some relevant skills such as Python programming, Web Designing, and SQL.

****Formatting: 70****

The resume has a clean and simple layout, but there are some formatting issues:

- * The education section is not properly aligned, and the font size is inconsistent.
- * The "CO-CIRCULAR ACTIVITIES" and "PROJECTS" sections are not clearly separated, which makes them hard to distinguish.
- * The "PERSONAL PROFILE" section is not necessary and takes up valuable space on the resume.

****Suggestions for Improvement:****

1. Simplify the education section by using a standard format and removing unnecessary information.
2. Clearly label the "CO-CIRCULAR ACTIVITIES" and "PROJECTS" sections to make them easily identifiable.
3. Use bullet points to organize the "SKILLS" section and make it easier for ATS to extract relevant information.
4. Remove the "PERSONAL PROFILE" section and focus on showcasing relevant work experience, skills, and achievements.
5. Consider adding a professional summary or objective statement at the top of the resume to provide a brief overview of the candidate's qualifications.
6. Use a consistent font and font size throughout the resume.
7. Consider adding relevant certifications or licenses to the education section.

****Final Score: 75****

Overall, the resume is decent, but there are some areas that need improvement to make it more effective for ATS scanning.
